

SlimLine™

Metabolic Weight Loss Technologies

Technical Specifications

System with Facial Panel & Oxygen Generator

Capsule/Facial Panel Color: Soft White

Height Closed: 39"/99 cm

Height Open: 83"/211 cm

Length: 89"/226 cm

Weight: 260 lbs/118 Kg

Widest Point: 35"/89 cm

Narrow Point: 22"/56 cm

Voltage: 220 V 50/60 Hz

Power Supply: 220v (12 A, 50/60 Hz)

Warranty: One year standard warranty and extended warranty available.

SlimLine Medical Grade Pure Oxygen

Oxygen makes up 21% of the air we breathe and the circulation of pure oxygen has proven abilities for metabolic stimulation, anti-aging, skin cell regeneration and other benefits. The SlimLine system is equipped with a powerful medical grade oxygen generator that delivers 99% pure oxygen into the whole body chamber or to the face area during each treatment for super intense oxygenated body treatments, oxygen inhalation and oxygen facial applications.

Metabolic Weight Loss Technologies

The SlimLine weight loss capsule is the newest, most technologically advanced spa medical capsule from Sybaritic, Inc., the first, original inventor and world's number one (1) leader of the spa and medical capsule industry. With over 30,000 spa and medical capsule installations around the globe, Sybaritic spa and medical capsules are recognized as the industry's most innovative and leading capsules available today.

Now, with SlimLine, multiple weight loss technologies have been integrated inside the new comprehensive weight loss device for increased metabolic stimulation, weight loss and related physiological benefits.

Calorie Burn & Basal Metabolic Rate Stimulation & Set Point

SlimLine delivers a totally all-new weight loss experience by incorporating state-of-the-art and proprietary features in an "all at once" treatment system. The SlimLine capsule provides an effective complete metabolic solution to help your patient's or client's lose weight and keep it off naturally. It's both enjoyable and successful because it overcomes the problem with traditional weight loss diets—they fail in the long run without increased metabolic stimulation and reduction of the body weight set point. When combined with a normal, balanced diet, the weight loss benefits of SlimLine become very rapid since calorie burn and metabolic stimulation is accelerated while the body weight set point is permanently reduced over time (10 - 12 months) for proven, lasting weight loss.

Unique Technology & Permanent Benefits

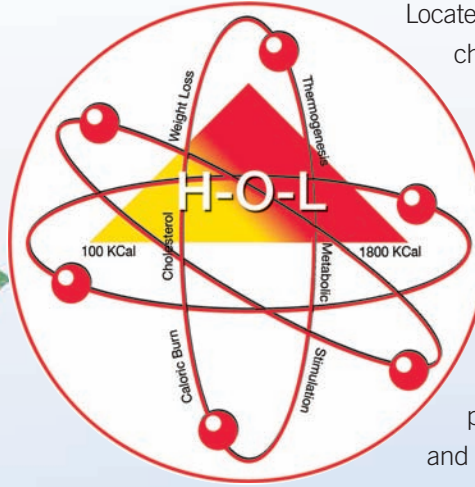

Convective dry thermal heat and deep penetrating near-infrared heat is administered simultaneously with therapeutic, intense LED light, P-NIR wavelengths and 99% pure oxygen.

This unique combination of technology naturally reduces fat mass content, which secretes leptin hormones and stimulates the hypothalamus to help clients/patients lose weight and tone their slimmed body in three ways:

ONE: The **Basal Metabolic Rate (BMR)** is increased in a manner similar to physical activity; just as a person's cardio system and metabolism would be stimulated by engaging in vigorous exercise. **TWO:** The body's "**Weight Set Point**" is decreased and adjusted to allow fat to be burned at a higher rate. Only by changing our metabolism and increasing our BMR can we permanently lower our body's "set point" and maintain lower ideal weight. **THREE:**

Redundant Excess Skin from Weight Loss will be Tightened. Fine lines and signs of photo-aging will be reduced by the complex of increased circulation and new cell growth enhanced by the intensive LED light modules.

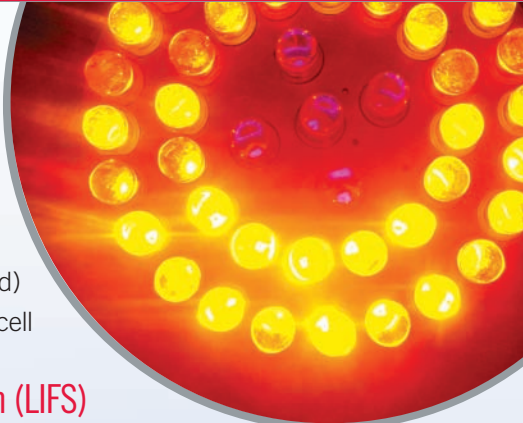

The Safe, Programmed SI-LED "Light Intensity Modules" (LIMs) Effectively Provide a Variety Benefits.

Located throughout the SlimLine™ body chamber, the LIMs have three (3) wavelengths of 590 nm, 630 nm and a proprietary NIR (near-infrared) wavelength for recovery and new cell stimulation benefits.

Light Intensity Facial System (LIFS)

The SlimLine Light Intensity Facial System provides more than 1300 wavelength super intensity LED light wave emitters. This wraparound facial system effectively delivers 590 nm, 630 nm and a proprietary near-infrared wavelength for additional facial slimming, tightening and anti-aging benefits.

The SlimLine Metabolic Capsule Features a Relaxing Array of Powerful & Permanent Weight Loss Technologies:

- **Touch Screen LCD** with eight (8) pre-set programs for tightening, contouring or detoxifying benefits.
- **Convective Thermal Dry Heat**
- **Near-Infrared Heat** (intense NIR-LED light waves)
- **Medical Grade 99% Pure Oxygen Generator** (surround, topical or inhalation)
- **30 m Amp Super Intense LED (Narrow Band Light Emission) Modules**
630 nm and 590 nm
 - ~ **Full Body Chamber LIMs Modules** (900 intense LED lights)
 - ~ **Adjustable Surround-Facial LED Panel** (1334 intense LED lights)
- **Therapeutic Whole-Body Vibratory Massage** with two (2) independent vibration motors
- **Calorie Burn Calculator**
- **Cool Facial Air Fans**
- **Ergonomic Comfort Bed with Heat System**
- **Aromatherapy • Music Therapy • Wake-Up Indicator**

Weight Loss Medical Study

A recent comprehensive weight loss medical study suggests that the use of the therapeutic and complex rehabilitation technologies of SlimLine are of tremendous benefits for obese patients and over weight individuals. Weight reduction and maintenance also helps prevent the possibility for obesity-associated diseases, such as type II diabetes, hypertension, cardiac ischemia, etc. Several different and important clinical parameters were studied including: clinical, psychological, psycho-physiological and biochemical. The study observed measurable improvements throughout the experimental group, indicating reduction in weight and fat mass percentage as well as reductions in anxiety, anger and depression.
