

PREMIUM HYDROSPA CAPSULES

## Product Overview: Spa Jet™ 2G

### Specifications

Length: 90"  
Width: 35.5"  
Height: 40" (closed), 84" (open)  
Weight: 265 lbs.

### Features

**Radiant Heat** | Radiant Heat is emitted by both the sun and the human body. Radiant heat and energy penetrate deeply. Radiant heat is tuned to the human body, has a similar spectrum of light emitting from the sun but without UV rays and creates unique vibration known as "resonant absorption." In the Dermalife capsules, radiant heat is produced by ceramic emitters. Our system is adjustable: low, medium and high settings can be selected at the touch of a button.

**Steam** | Moist heat softens the skin. Steam is also the only heat medium that has the natural composition to naturally cleanse and deeply hydrate the skin. Herbs or liquid vitamins infused into steam will enhance the spa experience. Dermalife Spa Jet features adjustable temperatures of steam up to 118°F (max).

**Hydrofusion™** | This extraordinary engineering breakthrough creates a single blended energy force through the harmonization of radiant heat and steam. It allows the spa technician to use both of these natural energies individually or concurrently. Radiant heat warms the body. Simultaneously, the steam creates a moisture layer or sheet on the skin's surface. Together, these elements join forces to create a powerful vortex of energy to optimize cleansing, moisturization, and the penetration of skincare products for advanced body and skin care.

**Cool Facial Air** | Keeps the client from overheating or feeling claustrophobic in the unit and dries facial masks when applied in combination services. Adjustable for your client's comfort, levels 1-10 are offered.

# Dermalife®

PREMIUM HYDROSPA CAPSULES

## State-of-the-Art Water System |

- **360 Degree Shower** | The state-of-the-art dual shower body spray system features 10 jets above the body and 10 jets below the body. All feature adjustable spray direction for a relaxing total-body massage. Spa Jet features components from **GROHE® Water Technology**, the leading global brand for innovative design, high-quality fittings, and sanitary systems. Spa Jet also features **SpeedClean®**, a patented anti-lime system that maintains the shower performance. The flexible, resilient silimer allows the 360° shower nozzle to “bend” when lightly wiped with a cloth or sponge and thereby forces the limescale to gently crumble away. Maximum showering comfort is ensured by an integrated thermostatic mixer, which maintains water at the set temperature.
- **Hand Shower** | An indispensable feature to rinse products from your client’s body and for cleaning the interior of the unit.
- **Double Tropical Mist System** | Dispenses a gentle mist of vitamins and minerals onto the body.
- **Foot Spray** | Soothe, revive, and refresh aching feet with two foot massager jets that spray water gently over the feet for a special spa experience.

**Vitamin and Aroma Systems** | Spa Jet features two unique reservoirs that vaporize and disperse herbal extracts to awaken the senses and to enhance results and enjoyment. Five different Oxygen Science™ Concentrate blends are included with the system: Vitamin, Herbal, Metabolic, Mineral and Wellness. To use the automatic diffusion system, simply fill the reservoir with the selected concentrate and it will be dispensed through the steam automatically and continuously.

**Translucent Exterior Shell** | The Dermalife Family has been crafted to operate aesthetically like a chameleon, constantly changing its look as it reflects and glows from the ambient light and its own Color Light system. Its pebble-grained translucent shell makes each system a stunning focal point for any spa décor.

**Deluxe Color LCD Display** | This sleek, multi-language display shows all of the features as they progress through the pre-set programs.

**10 Progressive Pre-Set Programs** | Ten programs (plus one customized) that automatically set the unit at a specific session time duration, session temperature and other system functions for optimal results and then transform throughout the session for the ultimate multi-sensory experience.
