

PREMIUM HYDROSPA CAPSULES

Product Overview: Spa Oceana™ 2G

Specifications

Length: 90"
Width: 35.5"
Height: 49" (closed), 91" (open)
Weight: 390 lbs.

Features

Radiant Heat | Radiant Heat is emitted by both the sun and the human body. Radiant heat and energy penetrate deeply. Radiant heat is tuned to the human body, has a similar spectrum of light emitting from the sun but without UV rays and creates unique vibration known as "resonant absorption." In the Dermalife capsules, radiant heat is produced by ceramic emitters. Our system is adjustable: low, medium and high settings can be selected at the touch of a button.

Steam | Moist heat softens the skin. Steam is also the only heat medium that has the natural composition to naturally cleanse and deeply hydrate the skin. Herbs or liquid vitamins infused into steam will enhance the spa experience. Dermalife Spa-Oceana features adjustable temperatures of steam up to 118°F (max).

Hydrofusion™ | This extraordinary engineering breakthrough creates a single blended energy force through the harmonization of radiant heat and steam. It allows the spa technician to use both of these natural energies individually or concurrently. Radiant heat warms the body. Simultaneously, the steam creates a moisture layer or sheet on the skin's surface. Together, these elements join forces to create a powerful vortex of energy to optimize cleansing, moisturization, and the penetration of skincare products for advanced body and skin care.

Cool Facial Air | Keeps the client from overheating or feeling claustrophobic in the unit and dries facial masks when applied in combination services. Adjustable for your client's comfort, levels 1-10 are offered.

Dermalife®

PREMIUM HYDROSPA CAPSULES

State-of-the-Art Water System |

- **53 Gallon Hydrobath** | Spa-Oceana features an innovative hydrobath tub with 8 back and 8 side massage jets, as well as 4 foot massage jets.
- **360 Degree Shower** | The state-of-the-art dual shower body spray system features 10 jets above the body. All feature adjustable spray direction for a relaxing total-body massage. Three pre-set shower programs are available as well as a Kneipp Scottish shower mode, alternating hot and cold jets. Spa-Oceana features components from **GROHE® Water Technology**, the leading global brand for innovative design, high-quality fittings, and sanitary systems. Spa-Oceana also features **SpeedClean®**, a patented anti-lime system that maintains the shower performance. The flexible, resilient silimer allows the 360° shower nozzle to “bend” when lightly wiped with a cloth or sponge and thereby forces the limescale to gently crumble away. Maximum showering comfort is ensured by an integrated thermostatic mixer, which maintains water at the set temperature.
- **Hand Shower** | An indispensable feature to rinse products from your client’s body and for cleaning the interior of the unit.
- **Double Topical Mist System** | Dispenses a gentle mist of vitamins and minerals onto the body.
- **Foot Spray** | Soothe, revive, and refresh aching feet with two foot massager jets that spray water gently over the feet for a special spa experience.

Vibratory Bed | Engages all of the body’s systems to work in unison toward the goal of systemic harmony. Cradling the body, the ergonomically designed support bed features a patented vibration system, featuring continuous and pulsating vibration to soothe or stimulate the body. The client can adjust the pattern of vibration and intensity during the program.

Vitamin and Aroma Systems | Spa-Oceana features two unique reservoirs that vaporize and disperse essential oils and herbal extracts to awaken the senses and to enhance results and enjoyment. Five different Oxygen Science™ Concentrate blends are included with the system: Vitamin, Herbal, Metabolic, Mineral and Wellness. To use the automatic diffusion system, simply fill the reservoir with the selected concentrate and it will be dispensed through the steam automatically and continuously.

Deluxe Color LCD Display | This sleek, multi-language display shows all of the features as they progress through the pre-set programs.

PREMIUM HYDROSPA CAPSULES

Translucent Exterior Shell | The Dermalife Family has been crafted to operate aesthetically like a chameleon, constantly changing its look as it reflects and glows from the ambient light and its own Color Light system. Its pebble-grained translucent shell makes each system a stunning focal point for any spa décor.

10 Progressive Pre-Set Programs | Ten programs that automatically set the unit at a specific session time duration, session temperature and other system functions for optimal results and then transform throughout the session for the ultimate multi-sensory experience. Oceana also offers **4 Hydrobath Pre-Set Programs**, along with one customized program.

Stereo-Ready | For the ultimate relaxation experience, Spa-Oceana features one 150-Watt waterproof speaker that can be easily connected to any audio source (stereo system, walkman, etc.) A headphone jack is also included.

DVD Entertainment Capabilities | The LCD screen is a built-in, high-resolution DVD monitor that provides clients with a variety of entertainment choices including movies and informational programs for ultimate enjoyment. (Requires external DVD player. Not included.)

TMAX Compatibility | Standard with every system.

Benefits to the Spa/Salon

- Offer your clients top-of-the-line, cutting-edge technologies
- Maximize the efficacy of services
- A luxurious heat source for endless opportunities
- Perform multiple services at once
- Perfect for pre/post massage & facials
